Hope for Tomorrow

QUOTES FROM UNVEILING 2ND MOBILE CHEMOTHERAPY UNIT "BUMBLE" ON SATURDAY 26TH JUNE 2010 AT HOPE FOR TOMORROW CHARITY POLO DAY

QUOTE FROM: Sir Stirling Moss OBE, Patron – Hope for Tomorrow

"The unveiling of Bumble will be a great moment for me, as that is the nickname of my late mother-in law. I am one of those lucky enough to have had a warm and loving relationship with my late mum-in-law".

* * *

QUOTE FROM: Lady Moss – Patron Hope for Tomorrow

My sister and I are very proud that wonderful memories of our beloved mother live on in this unit. She would be so happy to know that, through her illness, she has played a part in bringing patients the help they need today. It truly gives them hope for tomorrow.

* * *

QUOTE FROM: Lord MacLaurin – Chairman Trustees – Hope for Tomorrow

"The ambition of Hope for Tomorrow is to help cancer sufferers to receive their chemotherapy treatment close to home. We are delighted that Somerset will be operating our second Mobile Chemotherapy Unit, our immediate ambition being to have more units working in the South West of England, and ultimately to develop the programme on a wider national basis".

* * *

QUOTE FROM: Christine Mills, Founder – Hope for Tomorrow

The most gratifying thing about the concept of bringing Chemotherapy treatment nearer to patient's homes is the knowledge that it is so warmly appreciated by the patients and their families. In the three years since we launched our first Mobile Chemotherapy Unit we have received a constant stream of messages of thanks from patients who found chemotherapy treatment close to home has massively improved their lives.

QUOTE FROM: Rachel Levenson, Associate Director of NSF Developments, NHS Somerset

"NHS Somerset is delighted for the opportunity that Hope for Tomorrow will bring patients in rural Somerset. Being a very rural county, some cancer patients currently have to travel as long as an hour to hospital in order to receive their chemotherapy treatment. Access to this mobile service promises treatment much closer to home."

* * *

QUOTE FROM: Dr Sean Elyan, Medical Director of Gloucestershire Hospital NHS Foundation Trust and Consultant Oncologist.

"Hope for Tomorrow in partnership with GHNHSFT has been instrumental in the development high quality care through the principles of excellent patient experience, safe delivery of treatment and efficient use of resources".

The partnership between Hope for Tomorrow and GHNHSFT has enabled the development of this service which represents the first of its kind in the world. By bringing safe chemotherapy treatment closer patient's homes this initiative has massively improved the experience of care. The work is now continuing to ensure that more patients across a wider geographical area can access treatment delivered using this model."

QUOTE FROM: Derek Bell MBE – Patron, Hope for Tomorrow

"It is such an honour to be involved with Christine's 'dream' and to see the wonderful results of all her efforts coming to fruition.

Hearing the patient's stories makes one appreciate how much 'Hope for Tomorrow' has helped so many. There is a long way to go before fulfilling Christine's dream of having a Mobile Chemotherapy Unit located in every county, but as this programme gathers momentum, I can see it happening."
